

## How SkeeterVac® Exterminates

Female biting insects require blood to nourish their eggs. They get that blood from you, your family, your pets and your friends.

They track down hosts by sensing the carbon dioxide (the primary cue), moisture and heat from breath, body odors and color contrasts. SkeeterVac® mosquito exterminators create a combination of those cues. This tricks the insects into thinking the trap is a host.

Once the pests are attracted to the exterminator, they are captured on the sticky trap or sucked into the enclosed WaveDrawer® by a powerful vacuum fan. Once trapped, they quickly dehydrate and die.

### Creating Cues

Propane gas from a standard grill tank is burned in a sealed combustion chamber where it is catalyzed into warm carbon dioxide and water. This precision mixture is exhausted out into the air stream.

A unique time-release FineTune® lure at the top of the unit emits a scent that increases the attraction power for many species. Different species like different levels of scent and only SkeeterVac® traps allow you to vary the amount of attractant to match the species in your backyard.

## LESS BITING INSECTS. MORE BACKYARD FUN.

### Don't Forget

**Tac Trap® Replacements**  
 (Model no. CPSX000021)

**FineTune® Replacements**  
 (Model no. CPSX000014)

### Proven Effective

Independent laboratory and field tests conducted by the USDA prove SkeeterVac® traps are effective at attracting, trapping and killing a wide variety of biting insects.

**CORDLESS**

### Easy & Affordable

Place the SkeeterVac® trap in a shady spot close to the area where the insects live. Connect a precision filled propane tank (not included). A multi-spark electronic igniter provides instant, safe and easy starts.

Trapping will begin and within 3-4 weeks you should realize a significant reduction in nuisance.

Maintenance takes only minutes. When the tank is empty you simply change it out, replace the patented sticky trap and empty the vacuum trap. Every few months the FineTune® lure is replaced.

No product is currently known to completely eliminate entire insect populations or the diseases they carry. However, SkeeterVac® mosquito exterminators can reduce the populations of biting insects within their specified range.

Product performance can vary due to location and environmental conditions.

Requires (1) precision filled standard grill propane tank with type 1 safety connector to operate. Not included.

# EASY, EFFECTIVE AND CONVENIENT

It's your backyard. And it's your right to enjoy it. But sometimes biting insects can make that hard to do.

Not anymore.

SkeeterVac® mosquito exterminators can quietly and safely reduce the nuisance of a number of biting insect species including mosquitoes, black flies, no-see-ums, biting midges and sand flies.

**LESS BITING INSECTS.  
MORE BACKYARD FUN.**

- **Attracts, Traps & Kills** – All-day, every-day to reduce biting insect populations
- **Controls Population Growth** – Removes female insects before they lay eggs
- **Cordless** – No cords to trip over, no service interruptions and no restriction on location
- **Exclusive FineTune® Baiting System** – A simple turn of a dial allows you to maximize performance by customizing the output of a supplemental attractant to match the species in your backyard.
- **Motion Lighting** – Attracts more species
- **Vac&Tac® Dual Trapping** – Powerful vacuum and sticky paper traps combine to increase capture performance
- **Patented TacTrap® with contrast pattern** – Captures mosquitoes but won't stick to you
- **Quiet, Odorless & Child Resistant**
- **Quick & Easy Assembly** - No Tools Required

## EXCLUSIVE FEATURES

### Vac&Tac® Dual Trapping System

- Powerful vacuum draws in mosquitoes on approach, increases capture rate
- High contrast patented TacTrap™ increases attraction
- High tack insures trapping, doesn't stick to you

### FineTune® Baiting System

- Enhances attracting power of CO<sub>2</sub>
- Adjust the variable dial to the mosquito species in your backyard
- Lure lasts at least 60 days
- Accepts most major brands of mosquito lures

### Motion Lighting

- Attracts a broader range of species
- Increases capture rate

### WaveDrawer®

- Oversized, easy to empty
- Doesn't reduce vacuum power as it fills
- No messy nets to manage
